## MULTI-STREAM PK III

The Pac-King III is equipped to collect three separate streams. The lower compartment is split vertically into ratios that best suit your needs and is equipped with a crusher panel and high compaction ram cylinders. The upper compartment has its own packer feed via a full width bucket with an automated canopy and it's equipped for medium to light compaction. This design allows the vehicle to be adaptable to many different applications such as separation of wet and dry refuse and commingled recyclables or refuse, commingled recyclables and newsprint etc.

### FEATURES:

- ❑ Capacities from 29 to 40 cu. yd.
- ❑ Upper & Lower 18" deep packers
- ❑ Lower packer has crusher panel and high compaction ram cylinders
- ❑ Upper packer has medium to light comp.
- ❑ Upper packer loaded by means of a full width bucket located behind cab
- ❑ Various tailgate configurations available
- ❑ Electronic packer control with multi-cycle function
- ❑ R.H. work brake with auto-neutral feature available for chassis equipped with Allison MD transmission
- ❑ Cab modifications available for stand up operation R.H. and /or L.H. side
- ❑ Various body split ratios available
- ❑ Twin underbody hoist cylinders for superior stability when raising body
- ❑ Front or transmission mounted hydraulic pump with hydraulic over speed control
- ❑ Wide range of optional equipment available

WITH THE CHOICE OF PACKERS, BODY CAPACITIES, BODY SPLIT RATIOS AND TAILGATE ARRANGEMENTS AVAILABLE, WE CAN CONFIGURE A VEHICLE TO SUIT MOST APPLICATIONS. IF YOU HAVE A UNIQUE REQUIREMENT, PLEASE ASK US, WE WILL DO OUR BEST TO ACCOMMODATE YOUR APPLICATION.
